# Introduction

The mark  
of responsible forestry

Our extensive range of panel finishes are the perfect partner to your design and specification needs to give your project that extra touch of quality, aesthetics and unrivalled performance.

All of our laminate finishes are laid onto a decorative paper film which is then impregnated with laminate resin to give a high resistance to wear and abrasion from day-to-day use. This layer is then bonded to either to engineered particle board or medium density fibreboard (MDF) depending on specification.

We have three ranges for you to choose the best finish for your needs, the first being our standard range. This comprises of the most requested solid colour and timber effect finishes which are available at no extra cost. Moving on we have our extra options in both solid colours and wood effect, these are available at extra cost.

Not only can we supply a wide variety of colours and timber effects, but we can also supply these with various textures to add an extra special tactile quality to your scheme.

Our laminate faced board supply has been audited and found to meet the requirements of standard(s) FSCSTD-40-004 (Version 3.0) EN and FSC-STD-50-001 (Version 2.0) EN for FSC® Chain of Custody Certification Scope of certification: The Purchase, Sales and Distribution of Timber Products.

The laminate faced boards do not require any special care. If required the surfaces can be cleaned with soft, non-abrasive cloths or sponges. All commercially available mild surfactant-based agents which may not contain any abrasive components are suitable.

## Standard Laminate Colour Options

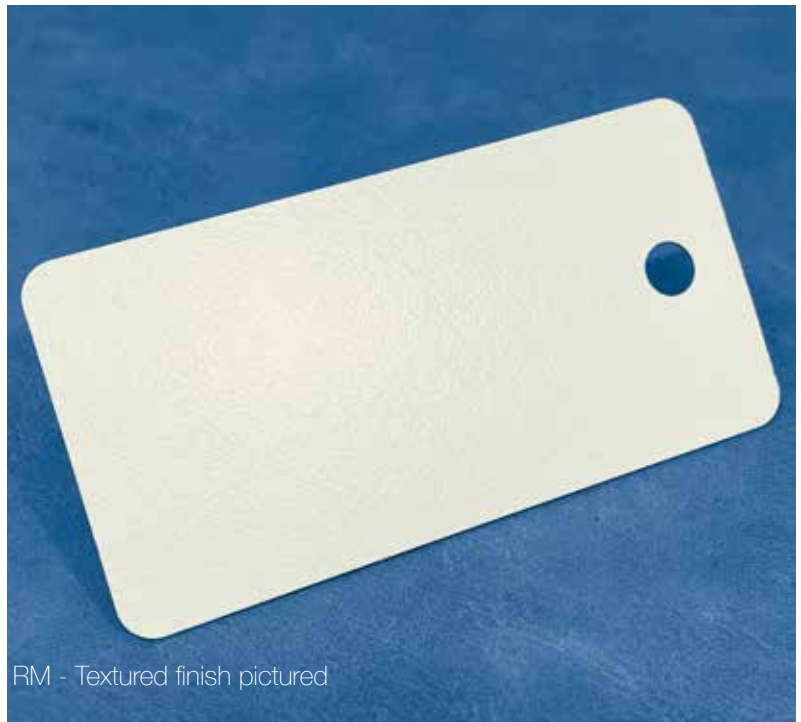

The mark  
of responsible forestry

These laminate options opposite forms our standard collection. We have chosen this collection for its ability to fit with most decor and colour schemes within a project.

Choose from either the solid colour range or wood effect to complement your interior design aesthetics and fulfilling your client's brief.

All standard colour and wood effect options are available in a subtle textured finish providing a soft sheen when the light glances over the partition seen in the photo below.

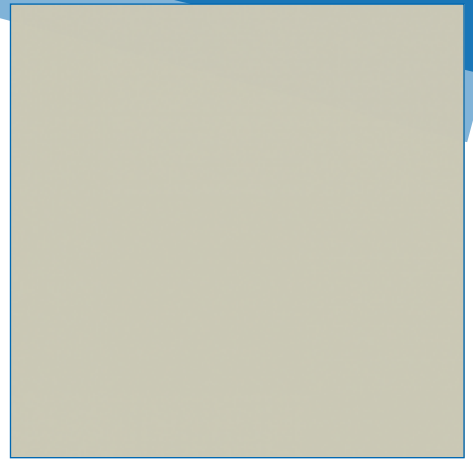

E&OE: Whilst every care has been taken to make this information and these finishes as true a representation as possible, printed media and/or computer screens will give slight variations. Samples of the actual finishes can be made available on request.

## Texture Guide

The mark  
of responsible forestry

The various colours and wood effects can have a textured finish giving even more combinations when thinking about the décor of a particular scheme.

When you chose a colour or wood effect from our standard range it will come with the RM finish which has a soft sheen 'light orange peel' like texture similar to an office desk or worktop.

Following on you can also request one of the following textures.

### Wood Grain

Not to be confused with the wood effect colours, this texture provides that extra dimension to the partition giving the actual texture of wood.

### Gloss Finish

As the name suggests, the gloss finish has a soft lustre which reflects the light back especially when high contrasting colours are used.

### Ultra Gloss

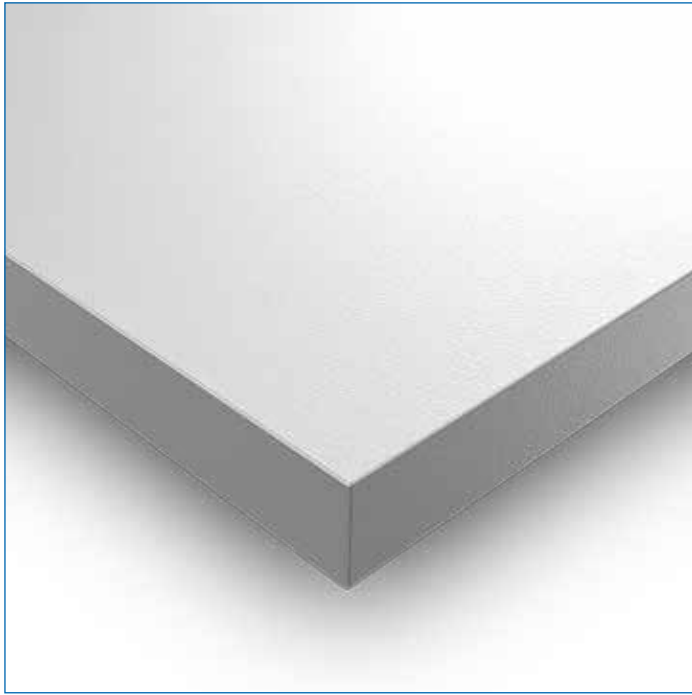

This is the next step-up gloss finish giving a very high lustre almost like glass, particularly good for complimenting a clean and modern scheme

### Matt Finish

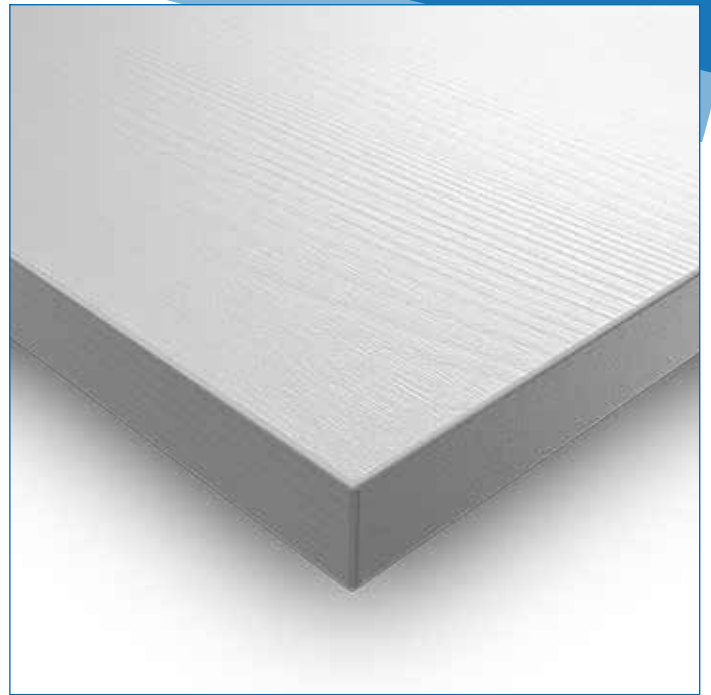

Now the other end of the spectrum, a smooth tactile finish, soft the touch and which diffuses light reflection within the room.

All textures are resilient to general day to day use and will look great for many years.
