MonoSwatch Vinyl Options

Introduction

Our vinyl partitions are available in a wide range of attractive colour options making these partitions fit easily in the decor scheme of your choice.

Made from water based inks (with special colours available to order) you can have your partition set in one colour or you can also order your partitions with a different colour on each side.

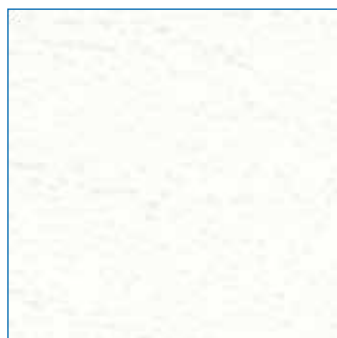

As standard all our vinyl partitions:

- Are made from strong, durable, light-fast material.
- Achieve fire retardancy to class '1' and '0' of BS476 Flame Spread and offer an early fire warning by reacting to heat and releasing a vapour which will set off an ionization type smoke detector.
- Are fully washable and contain antimicrobials to protect against mildew, mould and bacteria.
